

Hi, I'm Kanga Kiwi! I'm a kangaroo who **LOVES** kiwi. Can I tell you all about animals like me and my favorite fruit?

Kangaroos live in sunny Australia and jump **EVERYWHERE!** This means they need lots of energy, which they get from a herbivore diet. Baby kangaroos, called joeys, live in a pouch in their mommy's belly. Guess what could live in your belly? Kiwi!

Kiwi is a super yummy tropical fruit that contains **LOTS** of vitamin C. Just one cup of kiwi gives you **DOUBLE** the amount of vitamin C you need every day!

Kiwi can also lower your blood pressure, which keeps your heart happy and healthy!

You can be a superhero for the animals and eat plants like kiwi!
