

Hi, I'm Plum Harvest! I'm a spiky hedgehog who **LOVES** learning all about the animals and foods I share the planet with. Do you want to learn with me?

Hedgehogs get their name from the grunting sounds they make – just like mini hogs! They love hiding away in forests and are covered in more than 5000 spikes!
These cute creatures like to eat insects, but I bet they'd **LOVE** plums!

Plums are tasty fruits that are **VERY** good for your tummy. They also contain lots of antioxidants to keep your heart happy and healthy.

You'll find lots of vitamin C in plums, which helps to protect your immune system. They're also super tasty as a snack or in smoothies!

You can be a superhero for the animals and eat plants like plums!
