

Hi, I'm Pumpkin Head! I'm here to help you learn all about my favorite orange things: foxes and pumpkins!

Foxes are nocturnal and explore the world while you're sleeping. They are very sneaky and shy, but you can spot them by their fluffy ears and bushy orange tails! Foxes eat lots of different fruits and veggies - including pumpkins! Pumpkins are super delicious fruits that you see at Halloween, but there's nothing spooky about them!

They contain lots of vitamin A, which helps you see in the dark - just like foxes! They're also packed full of vitamins that keep your heart healthy and immune system super strong.

You can be a superhero for the animals and eat plants like pumpkin!
