

Hi, I'm Strawberry Patch! I'm a bunny who **LOVES** berries – especially strawberries! I'm here to tell you all about rabbits and strawberries and why they're so special.

Rabbits are fluffy creatures that enjoy tunnelling underground! They have long ears to listen out for danger and strong legs that help them leap high in the air. Rabbits love munching on grass, but they also have a sweet tooth – so strawberries are a tempting treat!

Strawberries are super healthy and packed full of essential vitamins! Even though they're nice and sweet, they're low in sugar and high in vitamin C. Why not enjoy strawberries as a snack or in a smoothie? You can be a superhero for the animals and eat plants like strawberries!
