

**Hi, it's great to meet you!
I'm Broccoli Beaver and I'm here
to tell you all about my two favorite
topics: broccoli and beavers!**

**Beavers are herbivores and amazing dam
builders. They eat bark and cambium,
which is found inside plants. They also
snack on water vegetation, buds and roots.
If they could, I bet beavers
would eat broccoli!**

**Broccoli is delicious and SO GOOD for you!
It's packed full of calcium which keeps your
bones strong.**

**Broccoli is a superfood, kinda like a superhero!
Just one serving of broccoli has DOUBLE the
amount of vitamins you need to stay healthy.
The vitamin C in broccoli will help to protect
your skin and eyesight!**

**You can be a superhero for the animals and eat
plants like broccoli!**
